**PIÑATA RESOURCES**  
EXPLORE EVALUATE DEVELOP

# COMPLETE EXPLORATION PROGRAM DELIVERY

## About Us

Piñata Resources was launched to provide geological services to the exploration and mining industry – something that our experienced staff have enjoyed doing for most of their careers.

Our team has experience in the whole process of exploration management and implementation. As exploration professionals we have identified, explored, evaluated, developed and operated mineral and energy projects in the Asia Pacific and South America regions.

Delivering the complete exploration program, Pinata Resources are involved from exploration design through permitting and land access, logistics management, safety and risk management, exploration execution and closure, compliance reporting, market disclosures and technical reporting for the exploration and resource development phases of the project.

*Responsible and experienced geoscience professionals  
with a healthy sense of adventure!*

# Our Services

Clients seek our services to advance projects through cost effective systematic exploration undertaken by experienced geoscience professionals. Our services:

- ✔ Identify, define and develop targets and deposits through appropriate exploration methods.
- ✔ Provide teams with appropriate experience to undertake exploration programs and manage the logistics of field programs.
- ✔ Conduct programs safely and with respect and consideration for the people and environment.
- ✔ Evaluate information progressively and provide timely insights to inform client decisions.
- ✔ Report activities in line with professional reporting standards and guidelines.

## Project Management

Our services span the project management phases: Plan, Prepare, Implement and Close. We apply this approach to all work we undertake ensuring services are provided in concert with client expectations. The project management approach is summarised as:

### 1. Plan

Work closely with clients to understand exploration objectives, stakeholders, resources, budgets and time frames.

Identify and coordinate requirements for internal and external permits, permissions and authorisations to undertake the program.

### 2. Prepare

Identify and schedule resources and where required manage the procurement of external services and products.

Plan and manage logistics, ensure personnel are prepared and able, and equipment is maintained and available for the planned program.

### 3. Implement

Conduct exploration programs including desktop studies, project reconnaissance and validation of historic work, geological mapping, geochemical sampling, geophysics surveys, drilling programs.

In the process of delivering programs, identify and manage risks and ensure progressive reporting to the client.

### 4. Close

Manage or coordinate rehabilitation works, site inspections and provide reports in compliance with permitting requirements and demobilise equipment and staff on program completion.

Provide technical content and support clients in development of market disclosures and reports .

# ACTIVITIES

- ▷ Compile and evaluate
  - › Historic exploration information
  - › Access & permit requirements
- ▷ Develop
  - › Exploration targets
  - › Exploration programs
  - › Project & risk management plans
- ▷ Coordinate
  - › Permitting & approvals
  - › Community consultation and land access activities
- ▷ Manage
  - › Procurement processes
  - › Logistical requirements
  - › Rehabilitation works
- ▷ Undertake
  - › Geological mapping
  - › Geochemistry
  - › Geophysics
  - › Drilling programs
- ▷ Report
  - › Technical activities & results
  - › Compliance performance
- ▷ Contribute and support
  - › Market disclosures
  - › Investor presentations

## Discover More

Pinata Resources plans, manages and conducts exploration work programs on behalf of concession owners and operators. Key activities include exploration management, geological mapping, geophysical surveys, geochemical surveys, technical reporting and market disclosures.
